

# Fasit Loop Alarm Brochure

## We are security!

Pro-Safe is one of the leading manufacturers of anti-theft alarms and security solutions for retail stores. Our solutions can be used to secure products in everything from a larger electronic chain to a smaller vendor and exhibitors.

By constantly being one step ahead of new technology we can provide innovative and simple solutions, tailored to fit the needs of the market and the demand new retail products require.

## Green Electronics

Imagine not having components travel halfway around the world before they are shipped to you, and imagine a product not being made in several power-consuming facilities.

By assembling and producing locally we reduce the use of valuable natural resources making our products a greener and less polluting alternative.

This is the power of Green Electronics.

## Holder Small

The easiest and most slim way to display and secure a mobile phone, camera or tablet.

The minimalistic design makes it ideal to display on a table or even a wall.

Simple to install and to change the inclined top to a flat one.

## Pro-Safe One

Pro-Safe One is a complete alarm solution for any product you want to secure.

Never before has it been this simple to secure a single product or an entire display.

Just like our Holder Small it is easy to change from the inclined top to a flat one.

Standalone

High Power

Color Options

There are a number of accessories, like the Tablet Holder, that are compatible with the Pro-Safe One and our other products.

## Tower Interactive

This unique solution lets you show one content on the screen while the product is on display and another when it's lifted.

Grab your customers attention by showing a demonstration of your phone, camera or tablet while the fully charged product is ready for your customers hands.

The integrated Recoiler makes it easy to install with no visible cables.

## Pro-Safe Tower

The Tower is a clean solution to display a wide range of products.

There are two sizes 11cm and 17cm, the latter has an integrated Recoiler system.

Both sizes can be prepared to use any of our sensors.

Recoiler

Securing tablets on the Tower is as simple and clean as using our other solutions.

The 17cm Tower is ideal for displaying tablets. Use our Tablet Holder and your tablets are ready to be used in any mode.

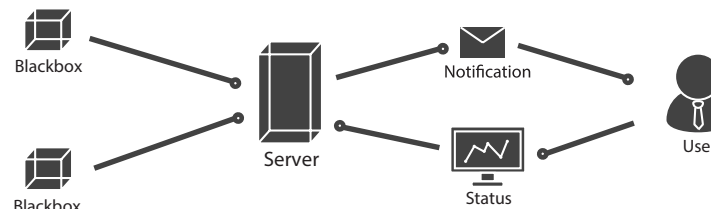

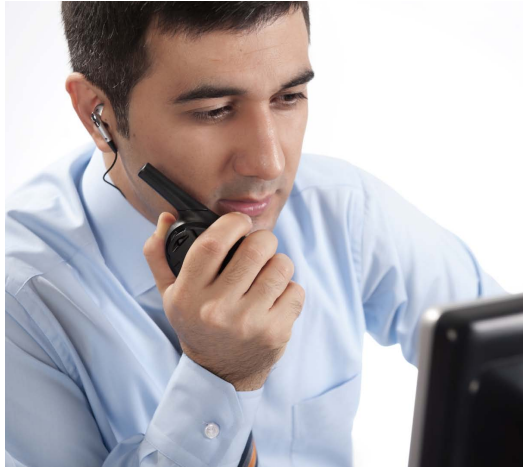

Pro-Safe Net is an entirely new way for retailers to monitor their alarm units online. The system consists of a module that is connected to either a new or older Pro-Safe Alarm Unit.

The user, which in this case could be a retail or security manager, can log into the web portal and see the status of the store or get notifications when something is wrong.

This way, the system provides support in the daily operations while its statistics function allows a more detailed analyze.

**Can you see the security?**

## Clean and simple

The recoiler is a simple yet efficient retracting system to hide the sensor cable.

It is the final product of years of developing and minimalistic Swedish design.

## High Power

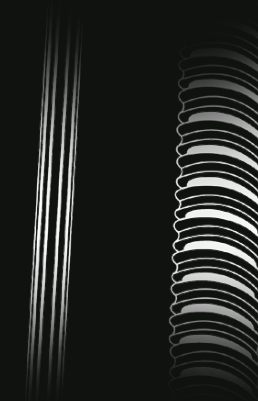

Charging your power demanding devices has never been easier.

The Recoiler system allows you to display phones, tablets and other devices fully charged at all times.

The kevlar reinforced cable is only 4 mm wide and 1 mm thick but can carry the same currents as a thicker coiled cable.

## **Exclusive**

**Display those high-end products in the elegant way they deserve without compromising with security.**

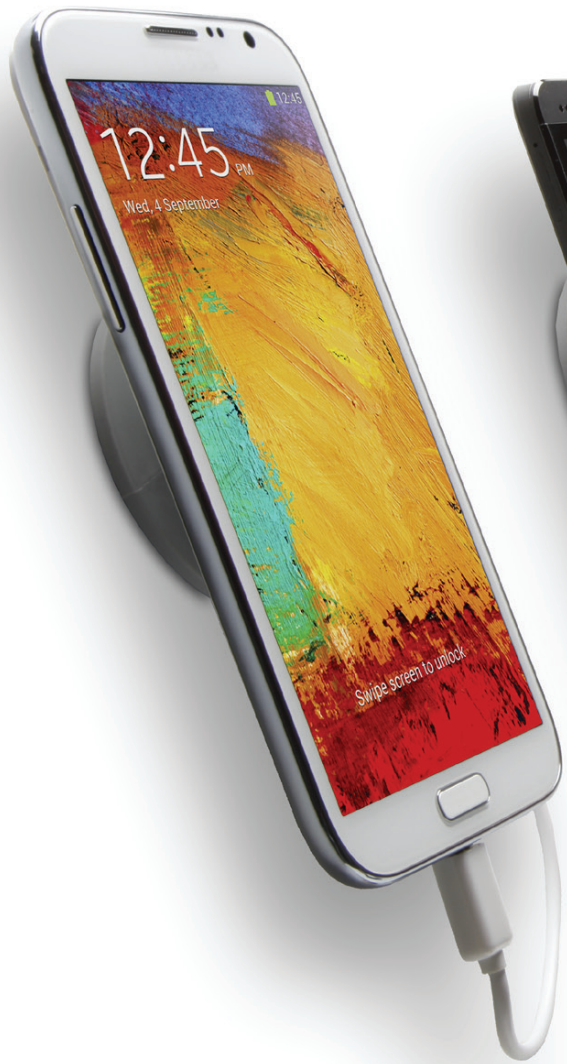

## Flexible

Use any of the accessories to fit your display and products.

Secure anything from a small perfume bottle to larger products like tactical scopes.
